Tomato sauce	QwikGo or RiteGo
Urine	QwikGo
Vomit	QwikGo or RiteGo
Water rings	RiteGo to even out the ring
Wax	Laundry TarGo or InkGo
Wine	BonGo or InkGo

Test on a hidden seam first on delicate colours and fabrics, and read the product's Safety Data Sheet before use. For professional use. Not sure which to use? Call us on **1300 70 69 70**.

How to use them

Read the Safety Data Sheet
before you use any of these products, and follow the label.

Wear the right protection
gloves and eye protection, with good air flow at the spotting table.

Test first
on a hidden seam when the colour or fabric is delicate.

BonGo — Beverage and tannin remover

WET CLEANING
Work BonGo into the stain with a brush or spatula and leave it at least 10 minutes. Don't rinse it off. Then wet clean as normal.

LAUNDRY
Soak the stain with BonGo, work it in and leave it at least 10 minutes. Don't rinse it off. Then wash as normal.

QwikGo — Protein stain remover

WET CLEANING
Soak the stain with QwikGo and work it in with a brush or spatula. Don't rinse it off. Then wet clean as normal.

LAUNDRY
Soak the stain with QwikGo and work it in. Don't rinse it off. Then wash as normal.

InkGo — Ink remover

WET CLEANING
Apply InkGo and work it in until the mark loosens. Flush with wet steam at the spotting table and dry with the air gun. Repeat if needed. Then wet clean as normal.

LAUNDRY
Apply InkGo and leave it as long as you can, at least an hour. Then wash as hot as the care label allows.

Laundry TarGo — Oil-based stain remover

WET CLEANING
Apply Laundry TarGo and work it in well. Give it time: at least an hour, overnight for a heavy mark. Then wet clean as normal.

LAUNDRY
Apply Laundry TarGo and work it in well. Give it time: at least an hour, overnight for a heavy mark. Then wash as normal.

RiteGo — Spray spotter

WET CLEANING
Spray RiteGo onto the mark. Tamp only the heaviest soil. Then wet clean as normal.

LAUNDRY
Spray RiteGo onto the mark. Tamp only the heaviest soil. Then wash as normal.

YellowGo — Dye remover

WET CLEANING
Mix 1 part YellowGo with 20 parts cool water in a clean bottle. Flush the stain with cool water, apply the mix and let it stand until the colour has gone. Rinse well. Then wet clean as normal.

LAUNDRY
Rinse the item, then soak it in warm water with 8 to 16 mL of YellowGo per litre, stirring now and then, until the colour has gone. Rinse well. Then wash as normal.

YellowGo — Taking out unwanted dye

The hotter the YellowGo solution, the faster it works. Use it hotter on whites and cooler on colours, to protect the original colour.

In the machine
Rinse the load well. Fill to a low level with hot water and add 8 to 16 mL of YellowGo per litre. Run until the unwanted dye has gone, then rinse well.

As a soak
Rinse in warm water. In a clean plastic tub, mix 8 to 16 mL of YellowGo per litre of warm water, with room for the item to move. Soak, stirring now and then, until the dye has gone. Rinse well.

At the spotting table
Mix 1 part YellowGo with 20 parts cool water in a clean spotting bottle. Flush the stain with cool water, apply the mix and let it stand until the dye has gone. Rinse well.

On colours, test a hidden seam first: cooler solution usually takes out the unwanted dye before the original colour. If the original colour starts to change, rinse straight away, then soak in a weak ammonia solution until it comes back. **Wool, silk or synthetics:** call us before using YellowGo on these.

InkGo — Ink

Ink usually comes out best at the spotting table. Start with InkGo: apply it to the stain, work it in until the stain loosens, then flush with wet steam. On some inks, adding Laundry TarGo on top of the InkGo works well too; flush well afterwards. Inks differ, so if one product only partly works, try another. **Ink through a whole load?** The answer depends on how you clean, so call us on 1300 70 69 70.
